PROFESSIONAL SUMMARY

Frontend Engineer with 2 years of professional experience building and deploying scalable, high performance web applications across SaaS, EdTech, and ecommerce domains. Proficient in React, Next.js, TypeScript, Vue.js, and Nuxt with expertise in component architecture, custom hooks, REST API integration, and state management. Proven record of implementing role based access control, JWT authentication, server side rendering, and Core Web Vitals optimization. Skilled in responsive design, version control with Git, and CI/CD deployment via Vercel. Collaborative team player in Agile and Scrum environments, consistently delivering accessible, user centered interfaces on schedule.

TECHNICAL SKILLS

Frontend Frameworks and Libraries: React.js, Next.js, Vue.js, Nuxt, JavaScript ES6+, TypeScript

Styling and UI: Tailwind CSS, CSS Modules, Sass, Framer Motion, Responsive Design, Mobile First Development

State Management and Data Fetching: React Query, React Context API, Custom Hooks, REST APIs, GraphQL

Authentication and Security: JWT Authentication, Role Based Access Control, Protected Routing, OAuth

Performance and SEO: Server Side Rendering, Incremental Static Regeneration, Static Site Generation, Lazy Loading, Code Splitting, Memoization, Bundle Optimization, Core Web Vitals

Testing and Quality: ESLint, Prettier, Jest, React Testing Library, Cross Browser Compatibility, Web Accessibility

Tools and DevOps: Git, GitHub, Vite, Webpack, npm, Yarn, Vercel, Figma, Postman, CI/CD Pipelines, Agile, Scrum

Currently Exploring: Node.js, Docker, GraphQL, Jest, React Testing Library

PROFESSIONAL EXPERIENCE

Frontend Developer | Scrapers

Lahore, Pakistan | On-site | November 2025 - Present

- Architected and delivered 5 production grade web applications using React, Next.js, TypeScript, Vue.js, and Nuxt; engineered a shared UI component library of 40+ components, cutting new feature development time by 30% and enforcing design consistency across teams.
- Integrated RESTful APIs using React Query with caching, optimistic updates, and cache invalidation strategies, reducing redundant network requests by 40% and improving overall application responsiveness.
- Implemented role based access control with protected routing and JWT authentication across 3 user roles, eliminating all unauthorized access incidents and bringing security related bug reports to zero.
- Improved Core Web Vitals scores including LCP, CLS, and TTI through lazy loading, dynamic imports, code splitting, and Webpack bundle analysis, achieving a 35% reduction in initial bundle size and faster page load times.
- Partnered with teams of 6 engineers and designers to translate Figma designs into accessible, fully responsive UI components, delivered consistently within Agile sprint timelines.

Frontend Developer | World Wide Admission Hub (WWAH)

Lahore, Pakistan | On-site | November 2024 - October 2025

- Led frontend development of an AI powered student admission platform for 5,000 active students using React, Next.js, and TypeScript, directly contributing to a 25% increase in user onboarding completion.
- Engineered a complete authentication system covering registration, login, JWT token management, protected routes, and session handling across multiple user roles, reducing unauthorized access to zero post launch.
- Built 8 data dashboards and a student profile management module using React Query for real time server state synchronization, cutting manual page refreshes by an estimated 60%.

- Applied server side rendering and incremental static regeneration across 20 pages in Next.js, boosting SEO indexing scores and reducing time to first byte by approximately 40%.
- Delivered 20 modular UI components within Agile sprint cycles using component driven development principles, shortening QA turnaround time by 20% and increasing team velocity.

Frontend Developer | North Rays Technologies

Lahore, Pakistan | On-site | August 2024 - October 2024

- Developed and maintained 4 business websites using React and TypeScript with attention to layout precision and performance, achieving 100% client approval on delivery with zero post launch defects.
- Created a library of 25 reusable React components with TypeScript interfaces and prop validation, reducing code duplication by 40% and shortening average feature delivery time by 2 days per sprint.
- Connected 10 third party REST APIs using error handling and React error boundaries, cutting runtime API failures by 50% and strengthening overall application reliability.
- Validated layouts across Chrome, Firefox, Safari, and Edge on 5 device breakpoints, ensuring consistent user experience with zero compatibility issues escalated by clients.

Frontend Developer Intern | AppsGenii Technologies

Lahore, Pakistan | On-site | May 2024 - July 2024

- Built mobile first UIs for 3 client projects using React, JavaScript, and Tailwind CSS, integrating backend REST APIs and reducing handoff turnaround time by 30%.
- Added 15 reusable components to a shared design system, increasing code reuse across projects and cutting new developer onboarding time from 2 weeks to under 1 week.
- Followed Git branching workflows and took part in code reviews with senior developers, helping reduce merge conflicts by 25% and maintaining a clean version history.

PROJECTS

World Wide Admission Hub - EdTech SaaS Platform

Stack: Next.js, TypeScript, React Query, SSR, JWT Auth | Live: <https://wwah.ai/>

- Developed an AI powered student admission platform for 5,000 users featuring role based dashboards, authentication flows, student profile management, and AI assisted counseling; applied SSR and ISR for SEO gains, improving onboarding conversion by 25%.

Carflix - Vehicle Marketplace

Stack: Next.js, TypeScript, REST API, Lazy Loading, SSR | Live: <https://carflix.scraperrs.com/>

- Built a vehicle marketplace with advanced search and filtering, server side rendered product pages, and image lazy loading that reduced listing load time by 45%; ensured full browser compatibility and responsive layouts across all devices.

Red Sea Mall - Ecommerce Storefront

Stack: Next.js, TypeScript, SSR, Responsive Design | Live: <https://redseamall.com/>

- Engineered a high traffic ecommerce storefront with server side rendered product listings, mobile first design, and an optimized checkout flow; achieved green Core Web Vitals scores with sub 2 second LCP across all key pages.

Picture - Scrapers Platform

Stack: React, TypeScript, REST API, Responsive Design | Live: <http://picture-frontend.scraperrs.com/>

- Delivered a production grade web platform in React and TypeScript with REST API integration, a modular component architecture, and fully responsive layouts for consistent and scalable frontend performance.

Stylz - Lifestyle and Beauty Platform

Stack: Next.js, TypeScript, Framer Motion, Responsive Design | Live: <https://dev.stylz.me/>

- Designed and launched a lifestyle platform featuring Framer Motion animations, an engagement optimized UI, and fast page transitions that improved average session duration and overall user retention.

Pulsse - Enterprise SaaS Dashboard

Stack: React, TypeScript, RBAC, JWT, React Query | Live: <https://pulsse.io/>

- Architected a multi tenant enterprise dashboard with granular role based access control across 3 user roles, secure JWT authentication, subscription workflow management, and real time data visualization, bringing unauthorized access incidents to zero.

Miguel Camarena - Portfolio Website

Stack: React, Next.js, TypeScript, Responsive Design | Live: <https://miguelcamarena.com/>

- Created a professional portfolio site with precise layout execution, smooth UI interactions, and performance optimization delivering fast load times and a polished experience across all screen sizes.

Pakpreneurship - Business Portal

Stack: React, Next.js, TypeScript, SEO, Responsive Design | Live: <https://pak-preneurships.vercel.app/>

- Built an SEO optimized business portal using Next.js server side rendering, a 30 component design system, fully adaptive layouts, and a clean TypeScript codebase maintained to strict coding standards.

Halagaty - Regional Platform

Stack: Next.js, TypeScript, REST API, SSR, Accessibility | Live: <https://dev.halagaty.com/>

- Launched a regional web platform with server side rendering for improved search visibility, REST API integration, and an accessible, responsive UI tailored for a broad and diverse user base.

EDUCATION

Bachelor of Science in Information Technology

Superior University, Lahore, Pakistan | 2020 - 2024

AWARDS AND ACTIVITIES

- Devsinc Devathon (August 2024) - Competed in a product development hackathon and placed among top teams, demonstrating rapid prototyping, cross functional collaboration, and frontend engineering skills under pressure.
- 10Pearls SheTech Hackathon (2024) - Collaborated with a team of 4 to design and ship a real world web solution in a women in tech initiative, applying UI/UX thinking and React skills to deliver a working product.
